

I support Comment submitted by The American Radio Relay League concerning Docket ET 03-104. Broadband over Power Line (BPL) is a proposal with little, if any, credible scientific data to support approval of this docket at this time.

Further research and innovations in BPL are needed to avoid the great risk this innovative technology will not cause irreparable interference to licensed services operating in the 2 MHz - 80 MHz frequency range.

Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the general public.
